

Accompanying Documents

1. Marked-up copies of the originally presented claims incorporating the amendments made herein (Appendix A).
2. Clean copies of the pending claims after incorporation of the amendments made herein (Appendix B).

AMENDMENT

In the Claims:

Please cancel claims 4, 9, 10, 12 and 13 without prejudice or disclaimer.

Please amend claims 1, 5 and 11 as follows:

B1 1. (Twice Amended) A composition comprising an hyaluronic acid ester polymer in the form of a microsphere, a detoxified mutant of a bacterial ADP-ribosylating toxin, and a selected antigen, wherein said antigen is present in an amount of approximately .1% to about 40% (w/w) antigen to hyaluronic acid polymer, and wherein the antigen is not entrapped in the microsphere.

B2 5. (Amended) The composition of claim 41 wherein the detoxified mutant of a bacterial ADP-ribosylating toxin selected from the group consisting of LT-K63 and LT-R72. OK

B3 11. (Amended) A composition comprising (a) a microsphere comprised of an hyaluronic acid ester polymer selected from the group consisting of an hyaluronic acid where from about 75% to about 100% of free carboxyl groups are esterified with one or more alkyl groups, and a crosslinked derivative of hyaluronic acid in which about 0.5% to about 20% of the carboxyl groups of the hyaluronic acid polymer are crosslinked to hydroxyl groups of the same or a different hyaluronic acid molecule; (b) a selected antigen adsorbed to the microsphere, wherein said antigen is present in an amount of approximately 2% to about 25% (w/w) antigen to hyaluronic acid polymer; and (c) an immunological adjuvant.
